

Making Water Work Beautifully

INSTALLING TEACUP HANDLES

Refer to the [Parts Breakdown Book](#) for replacement part numbers or [contact customer support](#) for help in finding a part

You may need several of these tools:

- » Allen wrench (5/16 or 7/32)
 - Channel locks
 - Crescent wrench
 - Flathead screwdriver
- » Phillips head screwdriver
 - Pipe joint compound
 - Soft cloth
 - Teflon tape
- No tools necessary

For Phoenix Faucets:

1. Using an allen wrench, loosen set screw from side of handle. Lift off handle top.
2. Using a phillips head screwdriver, remove handle screw. Lift off handle.
3. Install new handle over stem and bonnet assembly.
4. Replace handle screw.
5. Position handle top on correct side of faucet.
6. Tighten set screw.

For Catalina Faucets:

1. Using an allen wrench, loosen set screw from side of handle. Lift off handle.
2. Install new handle over stem and bonnet assembly.
3. Tighten set screw.
